

Bona® Pro 16 Plus Buffer

The Bona® Pro 16 Plus Buffer is engineered to perform under the toughest floor sanding conditions while being economical as well. The Plus' 1.5 HP, 175 RPM motor, coupled with sealed, dual planetary gears, provides plenty of cutting power.

Features include convenient dual levers and interlock handle system to prevent accidental startups.

Close cutting under toe kicks and other hard to reach areas is facilitated by a low profile deck with 360° wraparound bumpers.

Also included are 50' of non-marking 14/3 cable, a handy cord lock for storage, and large, non-marking wheels for transport.

16" drive plate (AS2800130) is included. It features the exclusive, hook-mount "pad-lok" system designed for Bona® Conditioning Pads, giving you the flattest cut possible, whether padding, screening, or discing.

The Pro 16 Plus comes with a 3-year warranty on motor and gear box and a one-year warranty on all other components.

Technical Specifications

Motor1.5 HP Heavy Duty, Dual Capacitor, 115 Volt/60HZ, 9.6 AMP, 175 RPM
Machine Weight 95 Lbs.
Gear Box Dual Planetary, All-Steel, Permanently Sealed
Switch Dual Lever Control With Interlock
Pad Driver Included 16" Pad, Screens & Double-Sided Discs
Accessories Illuminator buffer light can be mounted easily
